**Tariffs & Rising Material Prices: Strategies for Contractors**

**Wednesday, April 1 8:30-10:30**
Bank of New Hampshire Stage, Concord, NH
Continental breakfast included

Owners, developers and contractors must be prepared with strategies to mitigate the risk of material price escalation in order to preserve the feasibility and profitability of their projects. There are a series of risk-mitigation strategies available at different stages of a project. The most effective risk-mitigation strategy, however, is the inclusion of a thoughtfully drafted material price escalation clause in the contract itself.

Remain competitive and learn about defining material price escalation, mitigating the rise of material price escalation, material escalation clauses... and more!
